Education

Norton University – B.S. Software Development

(Aug 2022 - 2026)

Relevant Coursework: Software Develop, Web Full-Stack , System Analytic ,Data Analytic, Design UX/UI

Technical Skills

Programming Languages: JavaScript, TypeScript , Python, PHP and C#.

Frameworks & Environments : React.js, Node.js, Next.js, Express.js, NestJS, FastAPI, Laravel, Flutter.

Databases: MongoDB, PostgreSQL, MySQL, SQL Server, Supabase.

Tools & Workflows: Version Control (Github / Gitlab) ,Gitflow strategy ,Notion ,VS Code ,Antigravity IDE ,Postman ,Swagger UI , Xampp and Figma.

Work Experience

Freelance Full-Stack Developer (2 years)

Phnom Penh

(Nov 2024 - June 2026)

- Architected and developed scalable web applications, writing clean, maintainable code for both dynamic frontend interfaces and robust backend APIs.
- Managed and developed various IT projects as a freelancer from the initial phase through to completion.
- Planned and managed projects utilizing Agile methodologies, including maintaining Scrum notes, facilitating Sprint Ceremonies, and tracking progress on a Kanban Board.
- Collaborated with teams and managed project codebases using Gitflow strategy to ensure system stability and efficiency.

Education & Training

Kiloit | Frontend Development Training (6 Months)

Phnom Penh

(June - December 2024)

- **Relevant Coursework:** HTML, CSS, JavaScript, React.js, Business Analysis, SDLC, Version Control (GitLab, GitHub), Project Mind-Mapping
- Built a personal portfolio website to showcase skills, projects, and modern UI/UX.
- Developed a Hospital Website with an integrated Hospital Management System, connecting frontend with backend APIs and testing endpoints via Postman.
- Created a Travel & Hotel Booking Website with listings, booking flow, and responsive design.
- Tested and integrated RESTful APIs using Postman.
- Planned project structure and user flows using mind-mapping techniques.

Above & Beyond(A&B) | Backend Engineering Bootcamp (3 Months)

Phnom Penh

(September 2025 - Jan 2026)

- **Relevant Coursework:** Node.js, Express.js, FastAPI, SQL, Business Analysis, Agile/Scrum, Gitflow Strategy, Kanban, Review Boards.
- Served as the main project leader for the backend engineering class, developing scalable architectures and managing workflows.
- Developed the capstone Full-Stack web/app project, Carresync.

Projects

AI Women's Health Assistant | Full-Stack Project

(March 2026 - Present)

- Developed a Progressive Web App (PWA) medical platform using Next.js, ensuring high performance and mobile-app accessibility.

- Built a robust backend with FastAPI and integrated a RAG-based AI assistant (Gemini API) for reliable health consultations.
- Integrated a Telegram bot to instantly notify doctors of emergency patient cases.
- Deployed the project on AWS Free Tier and Vercel for scalable and smooth performance.

Carresync | Full-Stack Project

(September - December 2025)

- Tech Stack: React.js, Shadcn, Express.js, PostgreSQL, AWS, CI/CD (GitHub Actions).
- Built a comprehensive mentorship and booking platform designed for high school students, university students, and professionals looking to transition careers.
- Developed features allowing users to seamlessly book and schedule meetings with industry experts across various fields (IT, Medical, Accounting & Finance) to gain real-world career insights.
- Implemented an automated CI/CD pipeline using GitHub Actions for continuous deployment to AWS.

Gas Station System | Full-Stack Team Project

(May 2025 - November 2025)

- Developed the frontend interface using React.js and seamlessly integrated it with backend APIs.
- Coordinated with the backend development team (Express.js) to ensure smooth and efficient API communication.
- Utilized the Waterfall methodology to effectively plan project phases and define key milestones.

Online School Management | Full-Stack Project

(Jan 2026 - May 2026)

- Developed an interactive e-learning platform for English and Chinese language courses, featuring integrated modules for homework and exercise submissions.
- Built a customized language proficiency placement test to evaluate new users and automatically assign them to the correct starting level.
- Implemented a sequential learning progression system requiring students to pass automated final exams to unlock subsequent course tiers.

ZaRoFashion | Online Clothing Brand | Founder

(July 2024)

- Built a responsive e-commerce frontend using React.js and Tailwind CSS.
- Integrated a Telegram bot to send order invoices to users.
- Added multi-language support (Khmer/English) for better accessibility.
- Deployed the project on Render for live access and smooth performance.

Angkor Food | [UX/UI](#)

(June 2025)

- Designed UX/UI for mobile and web e-commerce screens using Figma.
- Created wireframes, mockups, and prototypes to show user flows.
- Worked with developers to ensure designs were practical and consistent.
- Applied design principles to improve user experience across devices.

ApsaraAI | Ideathon : AI for Gender Inclusion Ideathon Mentors | Participant

(Oct 2025)

- **Topic:** *Education & Skills Development – Empowering Women in STEM*
- **Deliverables:** [Link to slide presentation](#)
- Helped develop ideas and solutions to promote women in STEM.
- Joined team discussions and research on AI solutions for gender inclusion.
- Worked with mentors and teammates to organize and present project results.

NETWORKING & CYBERSECURITY

- **Introduction to Cybersecurity** – Cisco Networking Academy (Norton University) | June 2026
- **Cybersecurity Essentials** – Cisco Networking Academy (Norton University) | 2026

LEADERSHIP & COMMUNITY INVOLVEMENT

Above & Beyond School | Backend Engineering class | project main leader

(September - December 2025)

- Directed a team of developers by strategically delegating technical tasks and managing the overall project workflow.

- Ensured team members met project milestones by providing guidance, technical support, and clear communication.

Maxwell Leadership | Preparing Event / IT Support

(Nov 2024)

- Helped organize leadership events, managing schedules and logistics.
- Provided IT support, ensuring presentations and equipment ran smoothly.
- Assisted teams with troubleshooting, device setup, and digital resources

Norton University | Class Monitor

(Jan 2024 – June 2026)

- Assisted lecturers with classroom coordination and announcements
- Helped classmates with academic tasks and group communication

The Art of Leadership in Generation Z Event

(May - July 2026)

- Conducted on-site Vox Pop interviews with event attendees to gather authentic testimonials and assess overall customer satisfaction.
- Analyzed participant feedback and compiled concise reports for the Marketing Leader to highlight key engagement metrics and event success.
